

E-SUMMIT 2026

**Presented By. Team
ANUDVEGA**

THE CHALLENGE

HPCL's B2B sales officers face:

Manual monitoring of 100+ sources daily

Missing tender deadlines (late discovery)

No systematic lead prioritization

Reactive sales approach (not proactive)

Coverage gaps across geographies

IMPACT:

*** ₹100+ crore in missed opportunities annually**

*** Tenders discovered too late**

*** Inefficient resource allocation**

THE GAP

The Gap

No automated mechanism to:

1. **Detect when a prospective customer** is likely to need HPCL's products
2. **Match** that need to specific **product** lines
3. **Prioritize and route** to the right sales officer
4. Close **feedback loop** for continuous improvement

THE PROPOSED SOLUTION

An end-to-end system that:

1. Monitors web sources (policy-safe)
2. Resolves company identities
3. Infers product needs (with explainability)
4. Scores & routes leads intelligently
5. Delivers via mobile app (offline-ready)

ARCHITECTURE DIAGRAM

PART 1

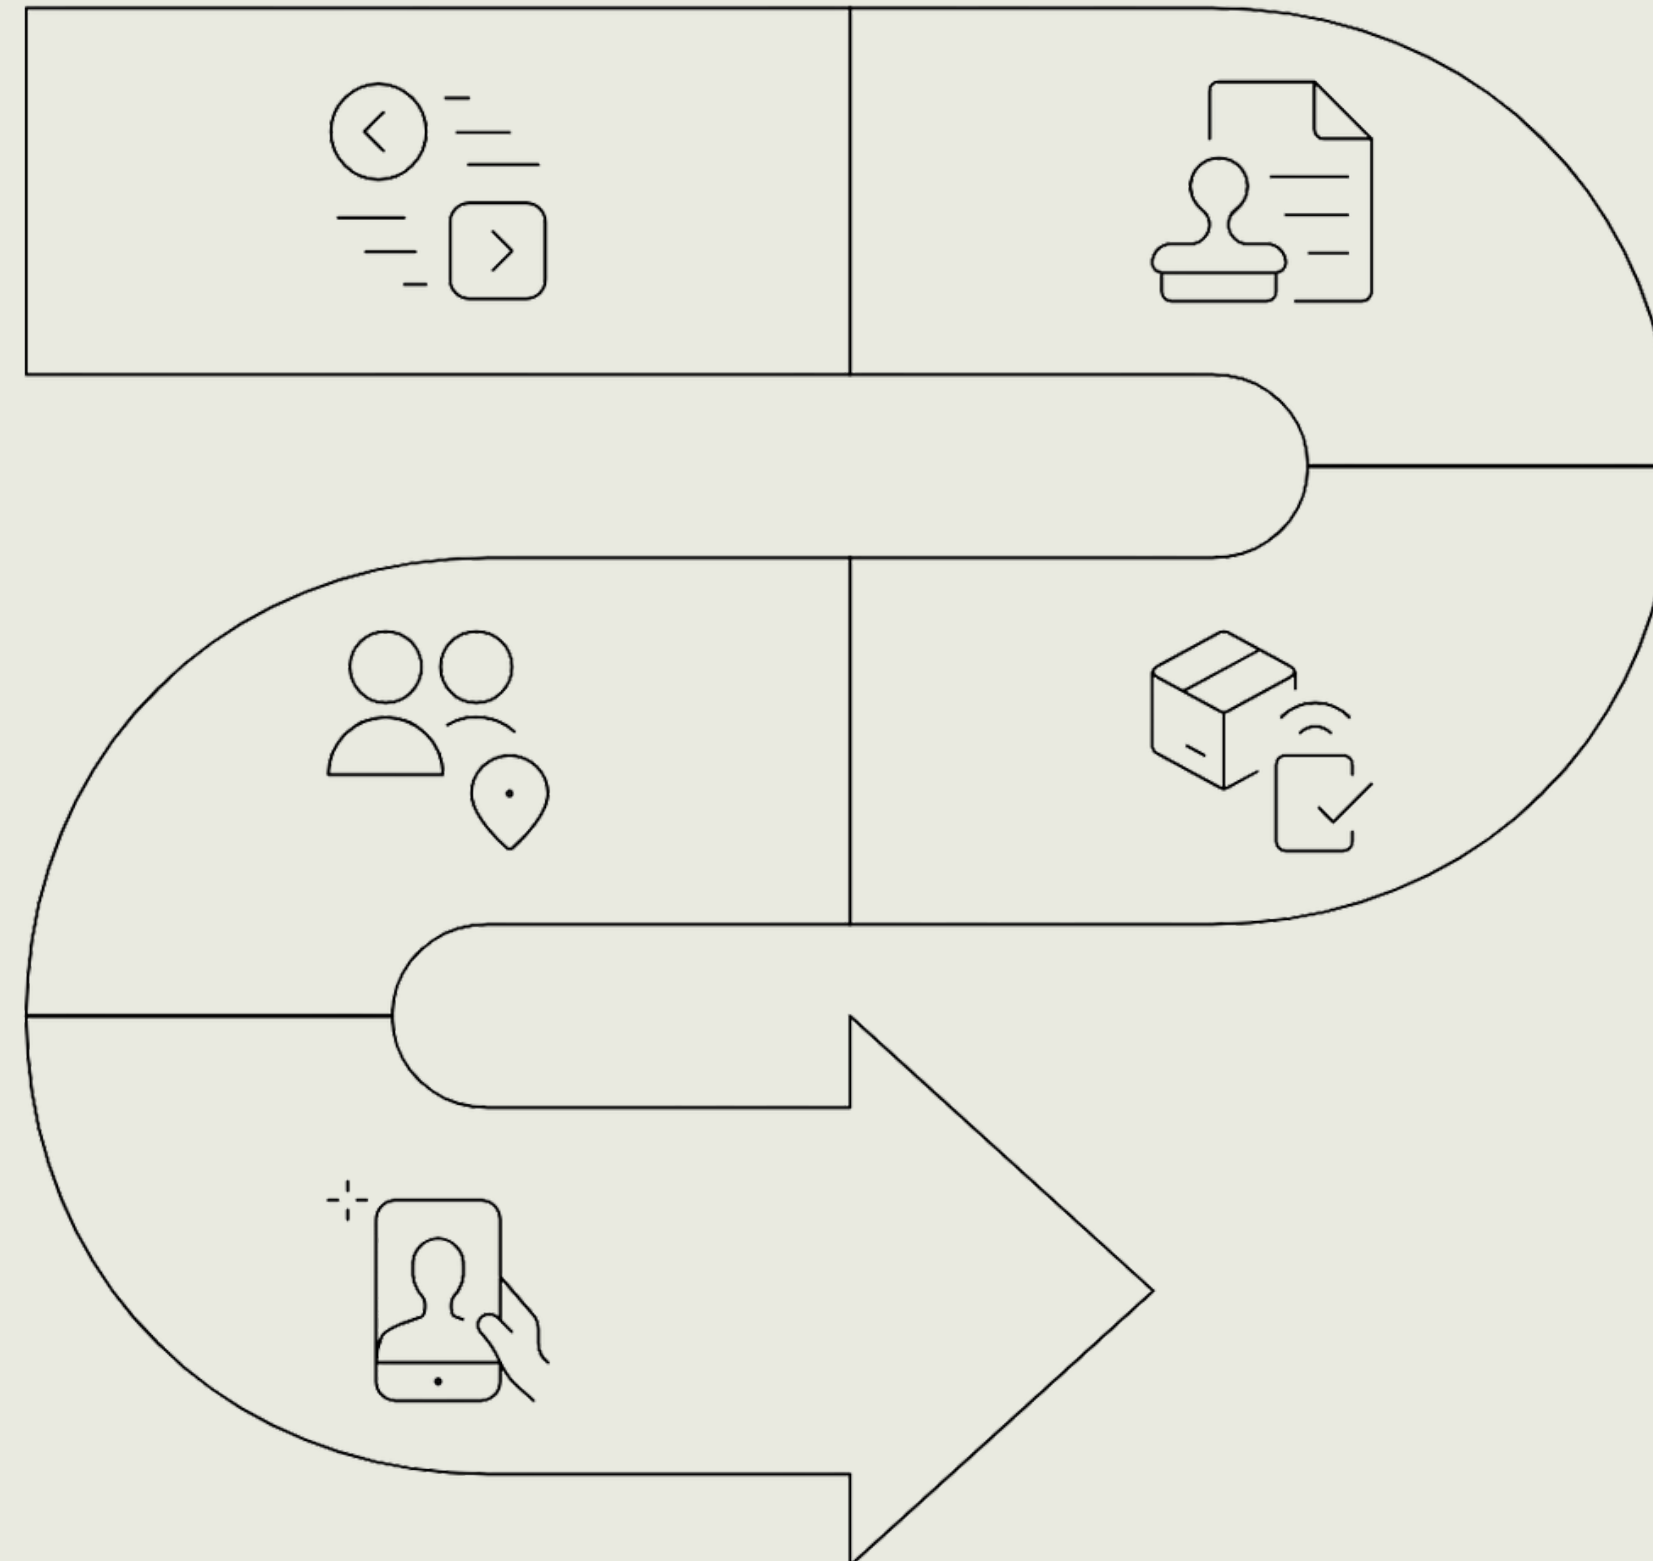

- 1.RSS feeds, APIs, public datasets
- 2.Provenance logging, trust scoring
- 3.robots.txt compliance

PART 4

1. 4-component scoring
2. Priority: HIGH/MEDIUM/LOW
- 3.Territory-based officer assignment

PART 5

- 1.New leads queue, lead dossier
- 2.One-tap actions (call/email/schedule)
- 3.Offline caching, low bandwidth mode

PART 2

- 1.Company name normalization
2. CIN/GSTIN/website matching
- 3.Target Company Card generation

PART 3

- 1.Signal extraction
- 2.Top 3 recommendations
3. Confidence scoring + reason codes

TECHNOLOGY STACK

Backend

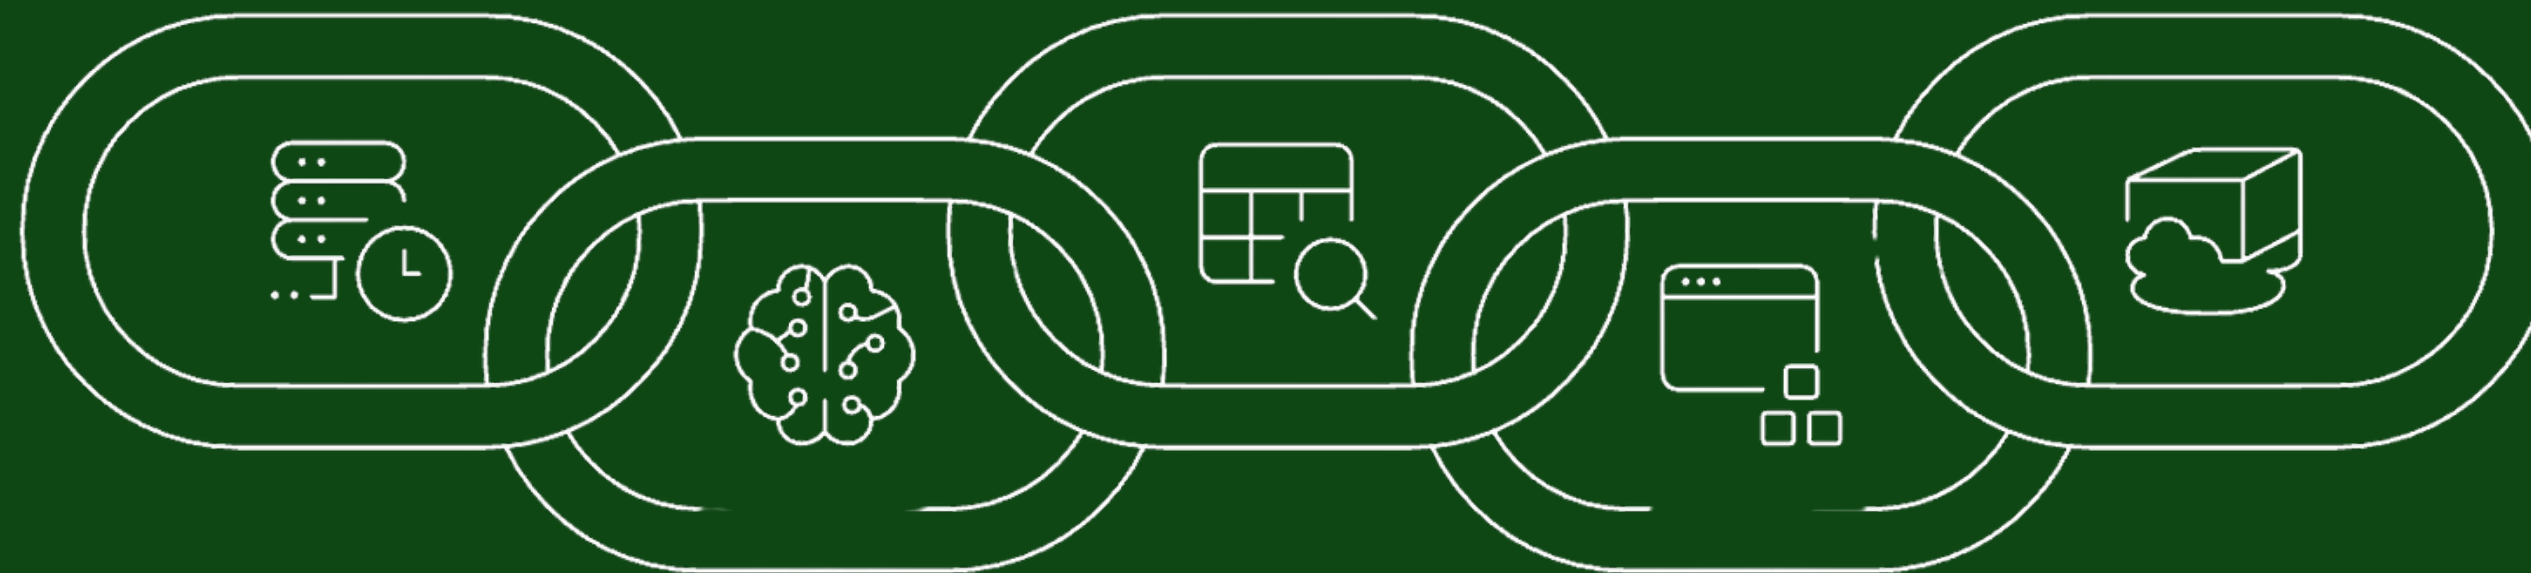

1. Python 3.11 (FastAPI)
2. PostgreSQL (structured data)
3. MongoDB (documents)
4. Redis (caching)

Web Intelligence

1. Feedparser (RSS)
2. Requests (API)
3. Provenance logging

Deployment

1. Docker containers
2. AWS/Azure ready

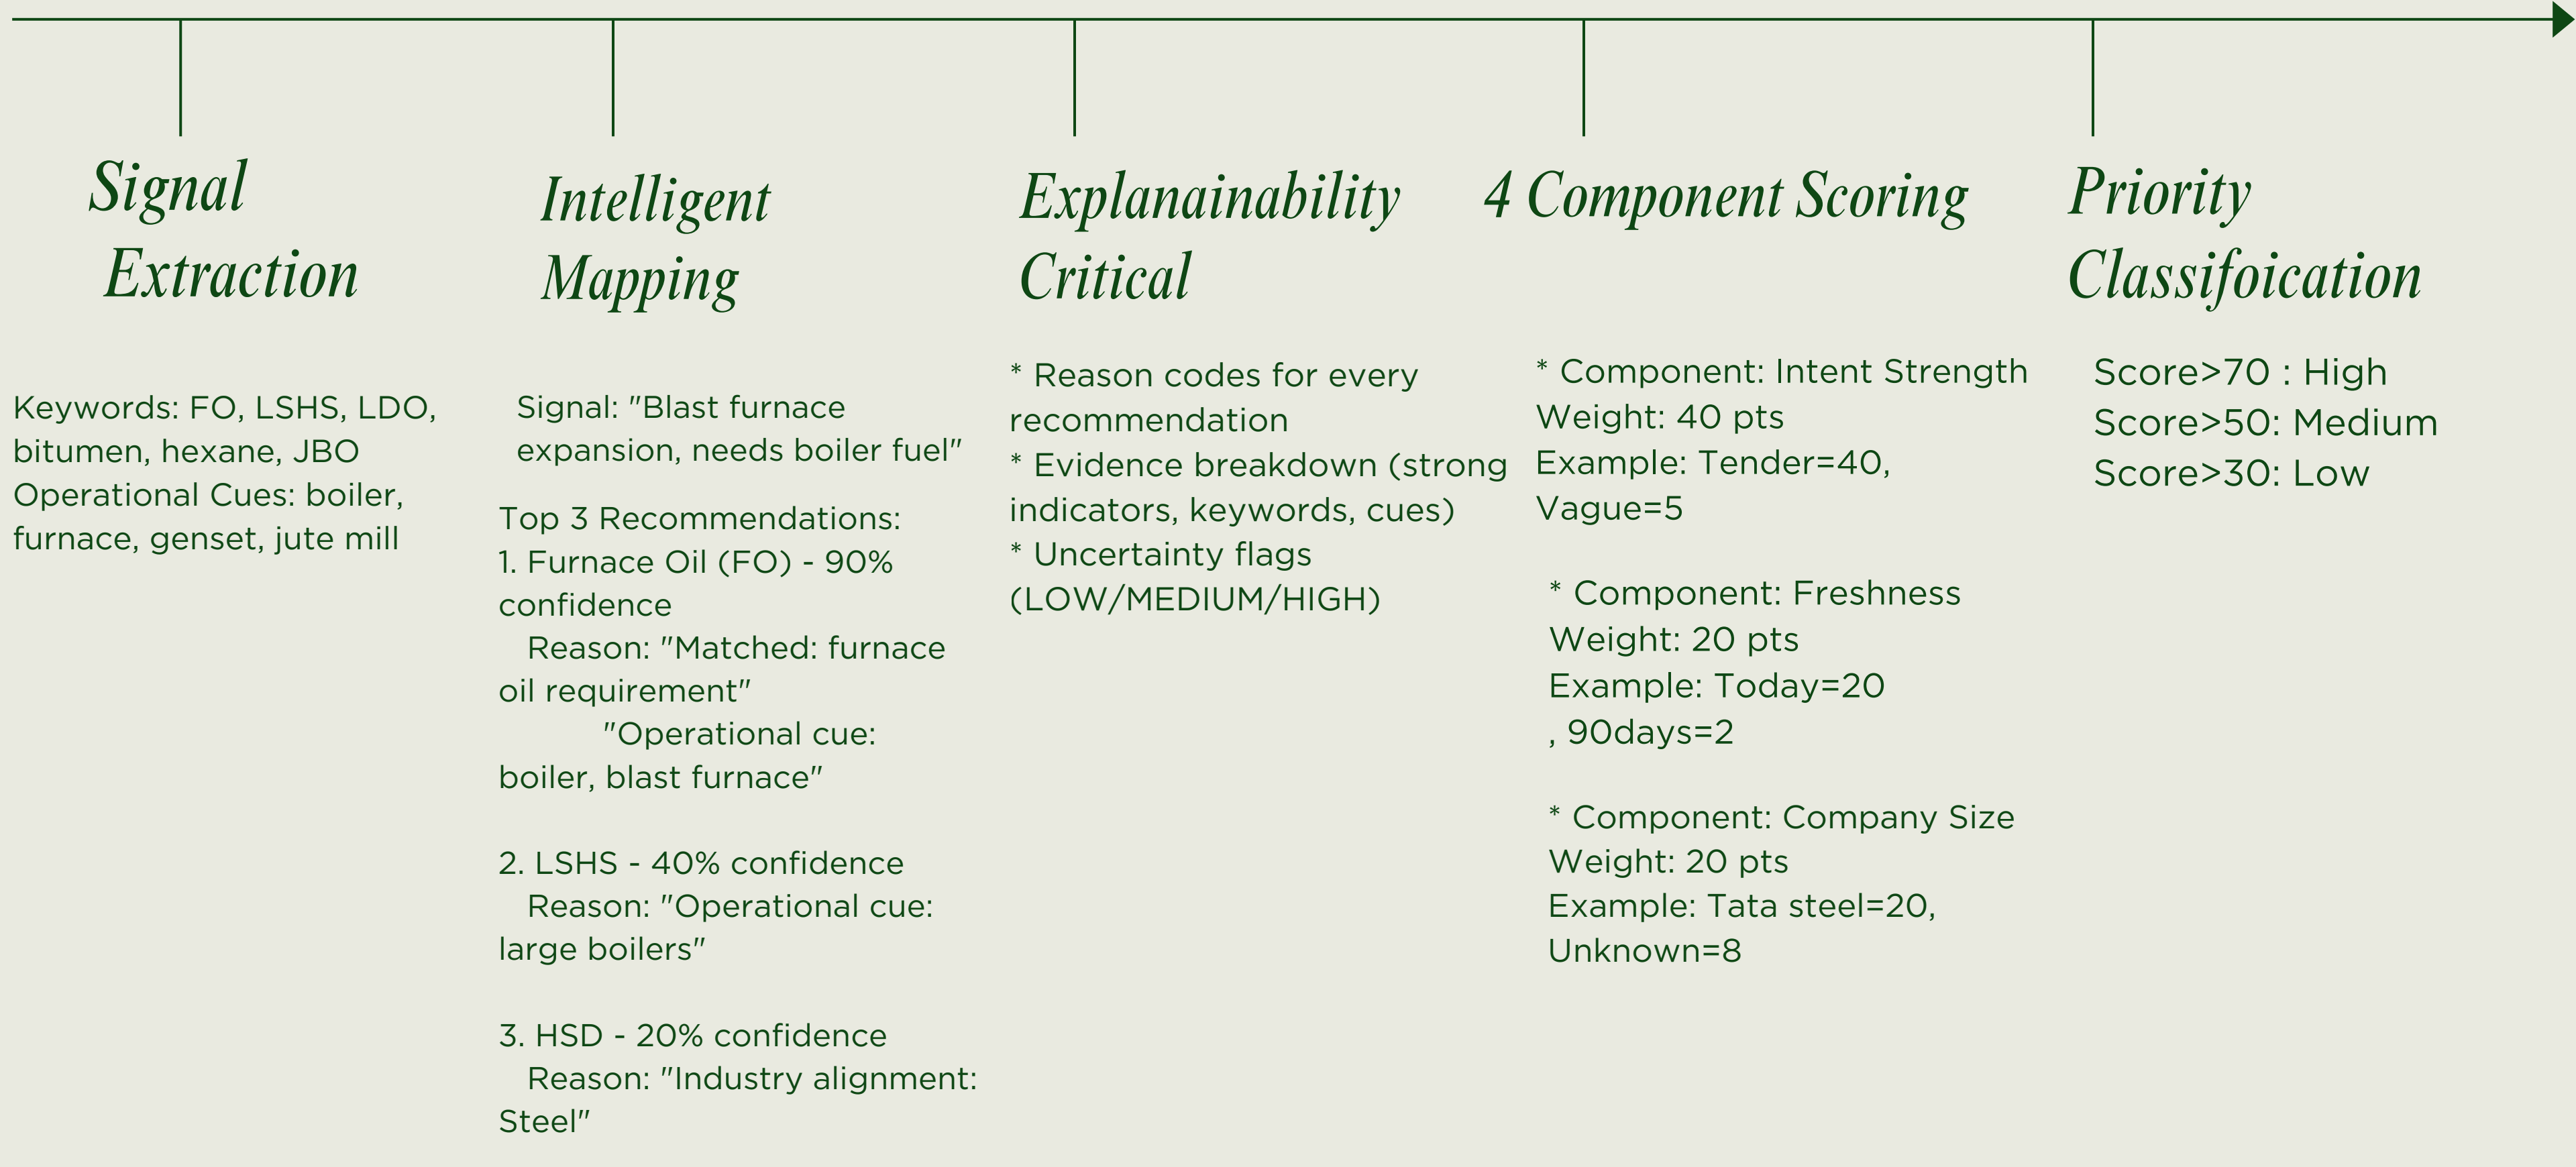

NLP/AI

1. spaCy (NER)
2. FuzzyWuzzy (entity matching)
3. Custom inference engine

Frontend

1. React 18 (PWA)
2. LocalForage (offline storage)
3. Axios (API client)

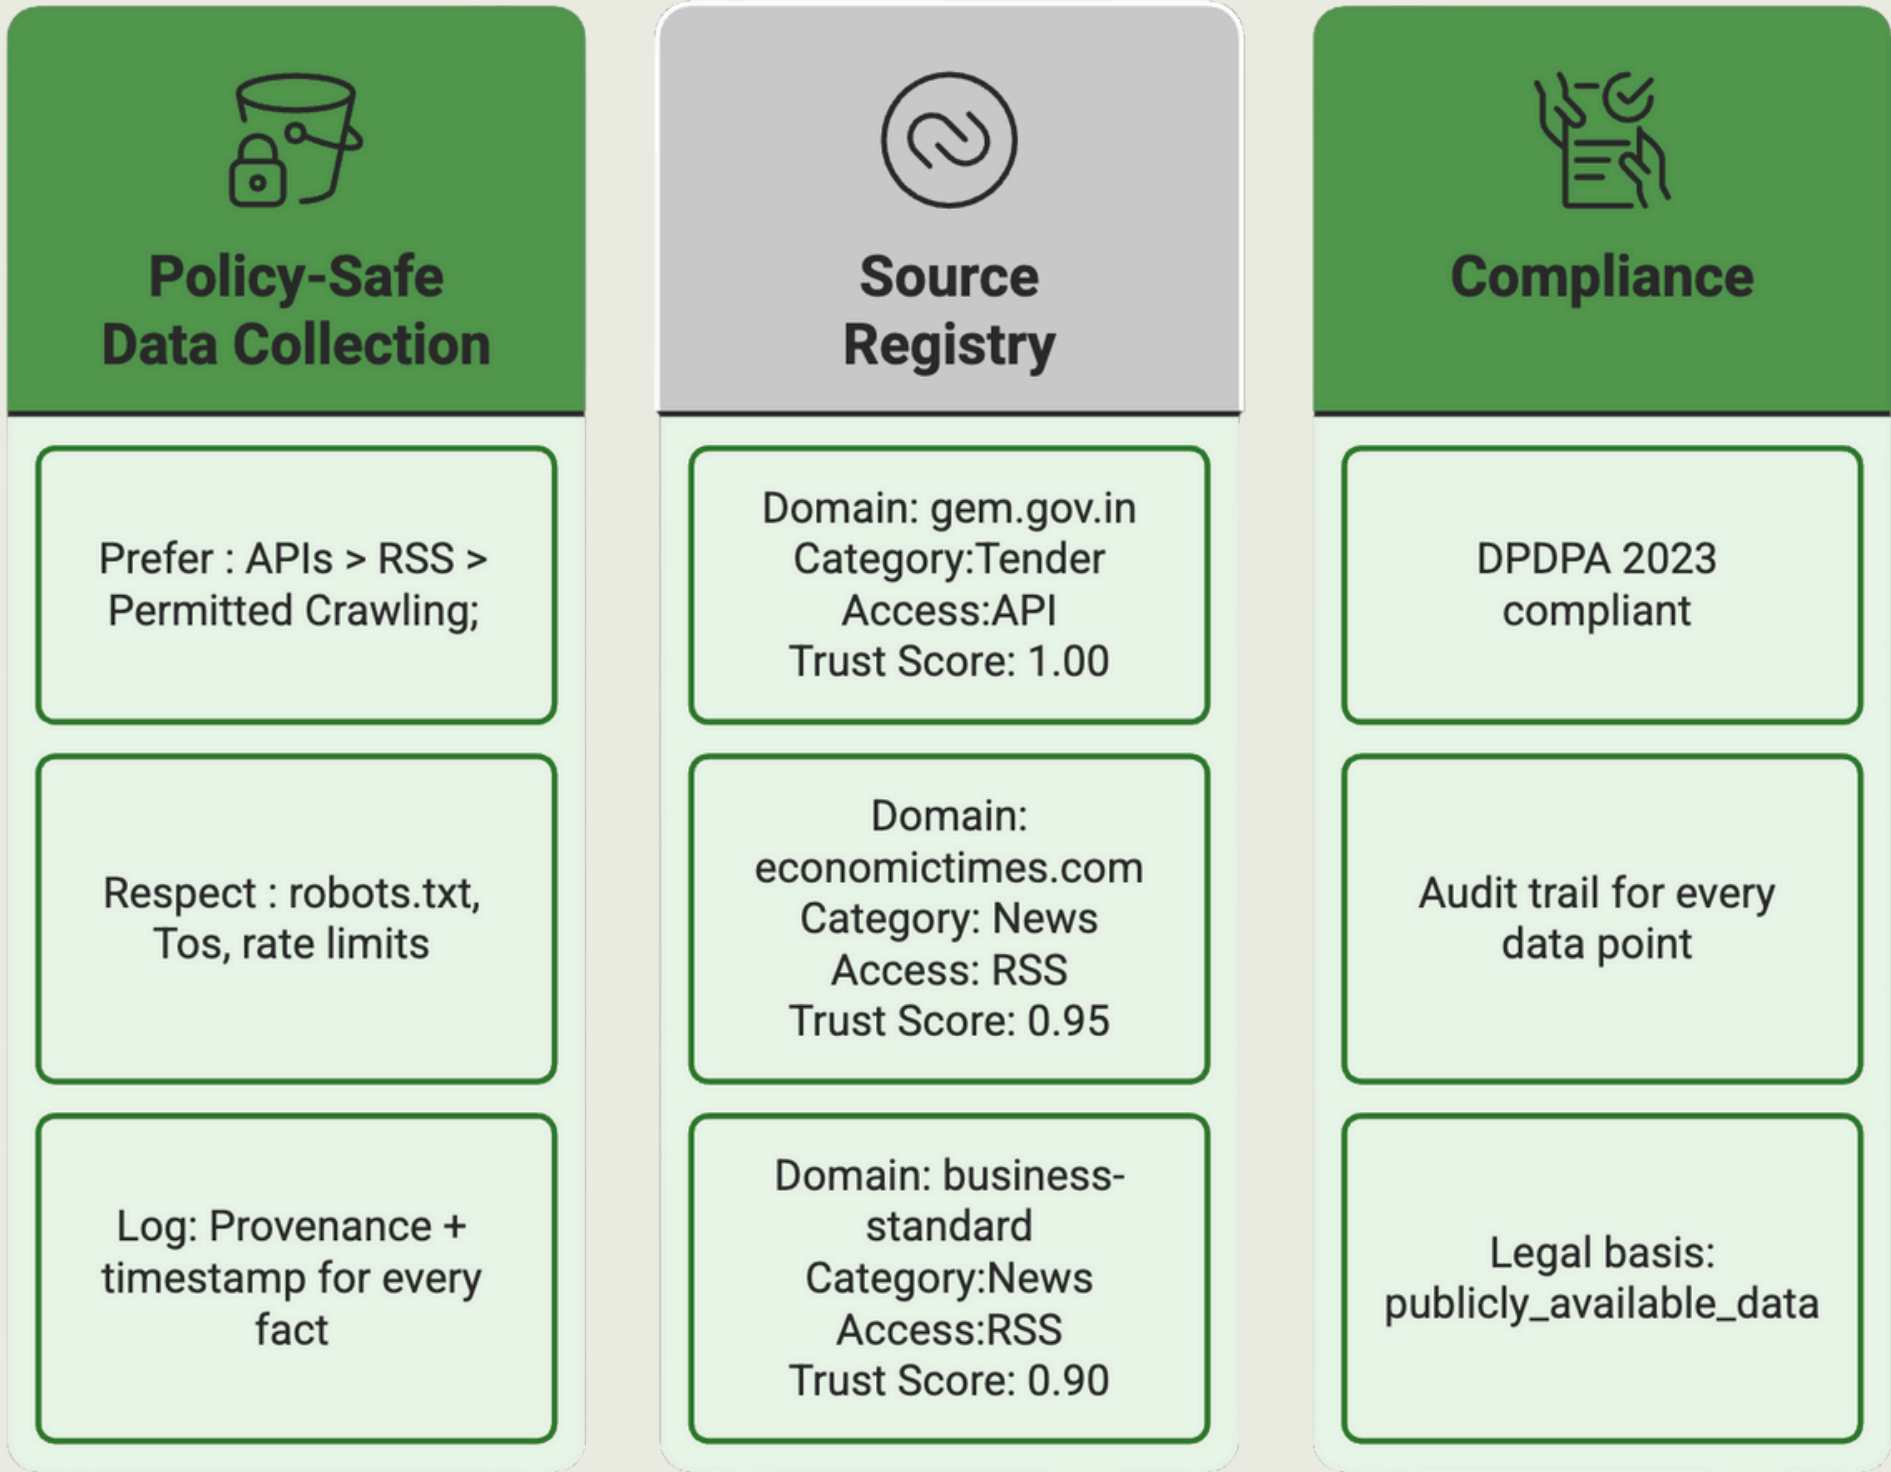

PRODUCT INFERENCE & LEAD SCORING

PART 1: Web Intelligence and source goverance

PHASE 1: WEB SCRAPING

- Fetch from 5 sources
- Enrich with contact info
- Deduplicate (80 → 75 signals)

PART 2: ENTITY RESOLUTION & COMPANY PROFILES

CHALLENGE

"Tata Steel Limited" = "Tata Steel Ltd" = "TSL" = ?

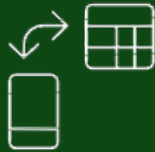

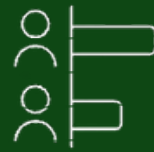

SOLUTION: MULTI-STAGE MATCHING

- Exact identifiers (CIN, GSTIN, website)
- Fuzzy name matching (85% threshold)
- Alias tracking

TARGET COMPANY CARD OUTPUT

```
{
  "entity_id": "ENT_000001",
  "canonical_name": "Tata Steel Limited",
  "aliases": ["tata steel", "tsl"],
  "identifiers": {
    "cin": "L27109MH1945GOI004748",
    "gstn": ["27AAACT2727Q1ZV"]
  },
  "industry": "Steel",
  "geography": {
    "headquarters": "Jamshedpur, Jharkhand"
  },
  "data_quality": {
    "completeness": 0.83
  }
}
```

WHAT MAKES US DIFFERENT?

	 Our Solution	 Competitors
Explainability	Every recommendation has reason codes	Black box AI
Policy-Safe	Full compliance (DPDPA, robots.txt, ToS)	Legal risks
Offline-First	Works without internet (cached data)	Require connectivity
Industry-Specific	14 HPCL products, operational cues	Generic solutions
End-to-End	Web scraping → Mobile app (complete)	Partial solutions

Thank you.
